

QUEST AFRICA - OUR CAMPUS

Quest Africa is nestled in the breathtaking Mulungwane hills of Southern Zimbabwe, surrounded by its own conservation area. Located about an hour from Bulawayo, with Esigodini being the closest town, our campus spans over 850 hectares of land known as the Quiet Waters Wilderness Estate.

One of the unique aspects of our location is the perfect blend of wilderness living and access to top-notch facilities. Students at Quest Africa have the privilege of enjoying the sporting and medical amenities offered by Falcon College. These include a well-equipped gym, swimming pool, various sports pitches, basketball, tennis, and squash courts, a sanatorium, chapel, and state-of-the-art ICT and design facilities. The school library is also available for students' use.

The purpose-built tented accommodation, situated on the picturesque banks of the Tetete River, provides a comfortable and immersive experience for students. Each tent accommodates 3-4 students and offers a cozy retreat amidst nature. Adjacent to the student accommodation, you'll find thatched eating and socializing facilities, complete with braai and campfire sites, as well as a unique 'bush' gym. The Quiet Waters dams are just a short walk away, offering opportunities for swimming and fishing, while walking, running, and cycling trails surround the campus.

As you explore the surroundings, expect to encounter a diverse array of wildlife. Impala, wildebeest, giraffe, zebra, and monkeys grace the landscape, making your morning runs and horse rides truly unforgettable. For the nature enthusiasts among you, keep an eye out for the tracks left by nocturnal animals that call this area home.

In addition to the exceptional facilities at Quiet Waters and Falcon College, the Quest Africa program takes students to various off-site locations for specific disciplines. Prepare to be captivated by the wonders of Matobo National Park, the Eastern Highlands, Hwange National Park, Victoria Falls, Lake Kariba, and even Lake Malawi. These locations provide unique opportunities for exploration, learning, and adventure.
